

THE REVIEW TEST

Course: Test Case Design Methods – BlackBox
(Decision Table, State Transition, Pair-Wise, Causes-Effects Diagram and Use Case)

Time: 10 minutes

- o0o -

Name: Bùi Thị Hoài Thương

ID: 3122411203

Class: DCT122C1

- o0o -

1. Decision table is used to

d. All of above

2. Given the business rules as below

Taxable product: Yes, No

Retail customer: Yes, No

Taxable customer: Yes, No

Customer address: Unknown (U), Domestic (D), Overseas (O)

Maximum number of rules is

d. 24

3. Decision table is used when

d. All of above

4. How many steps are there to come up a cause-effect diagram

d. 4

5. Make the steps below to a correct order

2. Develop a cause-effect graph

3. Transform cause-effect graph into a decision table

1. For a module, identify the input conditions (causes) and actions

(effect).

4. Convert decision table rules to test cases

6. How many techniques are used to identify all pairs for creating test cases
 - b. 2
7. State in State Transition is represented by a
 - a. Circle
8. Transition in State Transition is represented by a
 - b. Arrow
9. Action in State Transition is represented by
 - a. /
10. State Transition table
 - d. All of above
11. A use case is
 - a. A scenario that describes the use of a system by an actor to accomplish a specific goal
12. A scenario is
 - a. a sequence of steps that describe the interactions between the actor and the system
